Coaching Codex

COACHING CODEX · GUIDE 10 · AI FOR CUSTOMER SUPPORT

Build a 24/7 FAQ Chatbot

Answer common website questions while you sleep: a clean FAQ knowledge base, no-code chat options, tone and hand-off rules, and AI prompts that use only your confirmed facts.

FAQ
knowledge base from your facts

No-code
chat options compared

7
day launch plan with hand-off

START HERE

Your website can answer customers while you sleep.

Most small businesses get the same ten questions every week: hours, pricing ranges, parking, booking, returns. A no-code FAQ chatbot answers those from a knowledge base you control, then hands tricky cases to a human. This guide shows you how to build that knowledge base with AI, pick a chat tool that fits your website, set safe limits, and test before you go live.

What's inside

01 Why FAQ chatbots embarrass you (and how to avoid it) p. 3

02 Build your FAQ knowledge base p. 4

03 Pick a no-code chat option p. 5

04 Draft chatbot answers with AI p. 6

05 Tone, limits and human hand-off p. 7

06 Test before you go live p. 8

07 Hand-off scripts and escalation p. 9

08 Your 7-day chatbot launch plan p. 10

THE GOLDEN RULE

A chatbot should only say what you have written down and checked. AI helps you draft short FAQ answers from **your** hours, policies and prices. It must not invent availability, discounts, medical advice or promises you never made. When it is unsure, it should offer a human.

Got this from a friend? Get more practical AI guides at shop-ds.github.io →

SECTION 01 · WHY CHATBOTS FAIL

Why FAQ chatbots embarrass you (and how to avoid it)

A chatbot with a thin knowledge base guesses. Guesses become wrong hours, invented prices or promises you cannot keep. Fix the knowledge first; the widget is the easy part.

Mistake	What the visitor sees	Safer habit
Empty or outdated FAQ	Wrong hours or "I don't know" loops	Update the knowledge base when policies change
No hand-off	The bot argues or stalls	Always offer "talk to a person" after one failed try
Invented prices	A quote nobody approved	Only list prices you have written down
Too chatty	Long answers that miss the point	One short answer + one next step
No owner check	A typo goes live for weeks	You read every FAQ entry before publish

PROMPT · SPOT WEAK FAQ ANSWERS

Here are FAQ draft answers for my website chatbot:
[PASTE 3–5 DRAFT Q&A PAIRS]

For each answer, tell me: (1) which facts look confirmed, (2) which parts look like guesses or vague promises, (3) one safer rewrite that uses only confirmed facts and offers a human hand-off if anything is missing. Do not invent hours, prices or policies. If a fact is missing, ask me.

SAFETY FIRST

Never paste customer names, emails, phone numbers, medical details or payment data into an AI tool or chatbot training field. Use anonymized questions only. For health, legal or financial advice questions, the bot should hand off to a human every time.

Got this from a friend? Get more practical AI guides at shop-ds.github.io →

SECTION 02 · YOUR FAQ BASE

Build your FAQ knowledge base

Start with the questions people already ask: website contact form, email, phone and reviews. Aim for 8–15 short Q&A pairs covering hours, location, booking, pricing ranges you publish, and your main policy.

Hours & location

Open times, holidays, parking, how to find you

Booking & wait

How to book, cancel, reschedule; typical wait if you share it

Money & policy

Published price ranges, deposits, returns or refunds you actually offer

PROMPT · TURN BUSINESS FACTS INTO FAQ PAIRS

Turn these confirmed business facts into 10 short FAQ question-and-answer pairs for a website chatbot.

Business: [ONE-SENTENCE DESCRIPTION]
Confirmed facts:
[HOURS]
[LOCATION / PARKING]
[HOW TO BOOK]
[PUBLISHED PRICE RANGES OR "ASK US"]
[KEY POLICY]
Tone: [FRIENDLY / PROFESSIONAL], language: [LANGUAGE].

Each answer under 60 words. Use only these facts. Put anything that changes per customer in [BRACKETS]. If a fact is missing, ask me instead of inventing it. End answers that need a booking or decision with one clear next step.

EXERCISE 1 · YOUR TOP 10 QUESTIONS (15 MINUTES)

List the questions customers ask most. Copy facts from your website or policy sheet — do not invent.

#	Question customers ask	Confirmed answer (from your records)
1		
2		
3		
4		
5		

Got this from a friend? Get more practical AI guides at shop-ds.github.io →

SECTION 03 · PICK A TOOL

Pick a no-code chat option

You do not need a developer. Many website builders include a chat or FAQ widget, and several chatbot platforms paste a small snippet into your site. Plans and features change often — check current pricing on each site before you choose.

Option type	Best when	Watch for
Built into your website builder	You already use Squarespace, Wix, WordPress.com, Shopify or similar	Limits on AI answers and hand-off; check your plan
Chat / helpdesk widget	You want human chat by day and bot by night	Seat limits; set clear "bot only answers FAQ" rules
Dedicated FAQ chatbot platform	You want a knowledge base plus a site widget	Training on pages you have not checked; start with a short FAQ list you wrote
Form + AI draft (no live bot)	You are not ready for live chat yet	Still reply yourself; use AI only to draft from your FAQ

1. Write down where your website is hosted (builder name or host).
2. Check whether it already offers chat, FAQ or AI answers on your plan.
3. If not, shortlist one helpdesk widget and one FAQ-bot tool; compare hand-off, knowledge upload and current price.
4. Prefer tools that let you **edit every answer** before it goes live.

PROMPT · CHOOSE A FIT (NO INVENTED PRICES)

I need a no-code FAQ chatbot for my website.
Business: [ONE SENTENCE]
Website platform: [BUILDER OR HOST]
Must-haves: [E.G. EDITABLE FAQ, HUMAN HAND-OFF, WORKS ON MOBILE]
Nice-to-haves: [E.G. AFTER-HOURS ONLY]
Budget comfort: [E.G. FREE TIER FIRST / PAID OK — do not invent dollar amounts]

Suggest 3 option types (not brand rankings) that fit these needs, with one pro and one caution each. Do not invent prices or claim a tool has a feature I did not confirm. Ask me if you need more information.

START SMALL

Launch with 8–12 FAQ answers and a clear "talk to a human" button. A short, accurate bot beats a long, guessing one.

Got this from a friend? Get more practical AI guides at shop-ds.github.io →

SECTION 04 · DRAFT ANSWERS

Draft chatbot answers with AI

Use AI to turn your confirmed facts into short, consistent answers. You remain the editor. Every figure, hour and policy must match your records before it enters the chatbot.

1. Pick one FAQ question from your list.
2. Paste only the confirmed facts that answer it (no customer personal data).
3. Ask AI for a short answer under 60 words plus one next step.
4. Check every fact against your website or policy sheet.
5. Paste the checked answer into your chatbot knowledge base.

PROMPT · ONE FAQ ANSWER

Write a short FAQ chatbot answer in [LANGUAGE], under 60 words, tone [FRIENDLY / PROFESSIONAL].

Visitor question: [QUESTION]
Confirmed facts: [FACTS FROM MY RECORDS]
Business: [ONE SENTENCE]

Use only these facts. Do not invent hours, prices, availability, medical advice or guarantees. If something essential is missing, ask me before drafting. End with one clear next step (book, call, email or "talk to a person").

PROMPT · BATCH OF 5 ANSWERS

Using only the confirmed facts below, write 5 FAQ chatbot answers for these questions. Each under 60 words, tone [TONE], language [LANGUAGE].

Questions:
1. [Q1]
2. [Q2]
3. [Q3]
4. [Q4]
5. [Q5]

Confirmed facts:
[PASTE YOUR FACTS SHEET]

Label any question you cannot answer from the facts as NEEDS HUMAN. Do not invent details. Ask me if a required fact is missing.

EXERCISE 2 · DRAFT AND CHECK THREE ANSWERS (20 MINUTES)

Pick three questions. Draft with AI, then tick each check.

Question	Draft OK?	Facts match records?	Hand-off offered if unsure?

Got this from a friend? Get more practical AI guides at shop-ds.github.io →

SECTION 05 · TONE & LIMITS

Tone, limits and human hand-off

Your chatbot needs a personality and a fence. Tell it who it is, what it may answer, and when it must stop and fetch a person.

Setting	Example rule	Why it helps
Name & role	"I'm the Riverbend Dental website helper"	Visitors know it is not a clinician
Tone	Friendly, plain English, under 60 words	Matches your brand without fluff
Allowed topics	Hours, parking, booking steps, published fees	Keeps answers inside your FAQ
Off-limits	Diagnosis, custom quotes, complaints, account data	Forces a human for sensitive cases
Hand-off trigger	After one unclear answer, or on keywords like "complaint"	Stops loops and bad guesses

PROMPT · BOT PERSONALITY + LIMITS

Write a short system / welcome setup for my website FAQ chatbot (under 120 words).

Business: [ONE SENTENCE]
Bot name: [NAME]
Tone: [TONE]
It MAY answer: [ALLOWED TOPICS]
It must NOT answer: [OFF-LIMITS]
When unsure or off-limits it should say: [HAND-OFF LINE]
Human contact: [EMAIL OR "contact form" — no private numbers unless you publish them]

Use only these facts. Do not invent services, prices or medical claims. If something essential is missing, ask me.

- [ ] Welcome message states it is a FAQ helper, not a person
- [ ] Off-limits topics are listed in the tool settings
- [ ] A visible "talk to a human" / leave a message path exists
- [ ] After-hours: bot answers FAQ; messages queue for morning
- [ ] You can edit or disable any answer quickly

HAND-OFF LINE THAT WORKS

"I'm not sure I have the right answer for that. Leave your question and the best way to reach you (no passwords or card details), and a person from our team will get back to you."

Got this from a friend? Get more practical AI guides at shop-ds.github.io →

SECTION 06 · TEST BEFORE LIVE

Test before you go live

Treat the chatbot like a new staff member on day one: ask it the hard questions yourself, on your phone, before visitors do.

1. Open the preview or a private page with the widget.
2. Ask each of your top FAQ questions in normal customer language (including typos).
3. Ask one off-limits question on purpose (e.g. a complaint or a medical ask).
4. Ask something outside your knowledge base.
5. Confirm the hand-off path works and that you receive the message.
6. Fix weak answers in the knowledge base, then re-test.

PROMPT · BUILD A TEST SCRIPT

Create a 12-question chatbot test script for my business.

Business: [ONE SENTENCE]
FAQ topics I cover: [LIST]
Off-limits topics: [LIST]

Include: 6 fair FAQ questions (with slight rephrasing), 2 with typos, 2 off-limits, 2 completely unrelated. For each, write what a GOOD bot should do (answer from FAQ / hand off / ask a clarifying question). Do not invent FAQ answers; leave answer content to my knowledge base.

EXERCISE 3 · RUN THE PHONE TEST (25 MINUTES)

On your phone, ask the bot these. Note what happened.

Test question	Bot reply OK?	Fix needed
Hours / open today?		
How do I book?		
A complaint (should hand off)		
Something you don't cover		

Got this from a friend? Get more practical AI guides at shop-ds.github.io →

SECTION 07 · HAND-OFF SCRIPTS

Hand-off scripts and escalation

The best chatbot knows when to stop. Prepare short scripts for "I need a human", after-hours messages, and the reply your team sends in the morning.

PROMPT · HAND-OFF MESSAGE

Write 3 short chatbot hand-off lines in [LANGUAGE], tone [TONE], each under 40 words.

Situations:
1) Bot is unsure
2) Visitor asks something off-limits (complaint / medical / account)
3) After hours — leave a message

Business: [ONE SENTENCE]
How humans follow up: [E.G. email next business morning]
What visitors must NOT paste: passwords, card numbers, ID documents

Use only these facts. Do not promise a reply time you have not confirmed. If a fact is missing, ask me.

PROMPT · MORNING FOLLOW-UP FROM A HUMAN

Draft a short human follow-up email/message (under 80 words) for a visitor who left a chatbot hand-off overnight.

Business: [ONE SENTENCE]
What they asked (anonymized): [TOPIC]
What we can confirm: [FACTS]
Next step: [CALL / BOOKING LINK / ASK ONE QUESTION]
Tone: [TONE], language: [LANGUAGE]

Use only these facts. Do not invent outcomes. If something essential is missing, ask me before drafting.

1. Route hand-offs to one inbox or phone your team actually checks.
2. Reply to overnight messages first thing — even a short "we got this" helps.
3. If the same question keeps escalating, add a clearer FAQ entry.
4. Review chat logs weekly (no personal data in AI tools) to spot gaps.

NEVER LET THE BOT…

Collect passwords, card numbers or government ID. Diagnose health issues. Promise refunds, legal outcomes or custom prices you have not approved. Argue with an upset customer — hand off instead.

Got this from a friend? Get more practical AI guides at shop-ds.github.io →

SECTION 08 · 7-DAY PLAN

Your 7-day chatbot launch plan

A week is enough to go from scattered answers to a live FAQ bot with a working hand-off. Times below are estimates.

Day	Focus	Time (est.)	Done
1	List top 10 questions from email, phone and site forms	30 min	
2	Write confirmed facts sheet (hours, booking, policies, published prices)	40 min	
3	Draft FAQ answers with AI; check every fact	45 min	
4	Choose no-code tool; paste widget on a draft/private page	40 min	
5	Load FAQ; set tone, off-limits and hand-off	35 min	
6	Phone test script; fix weak answers	40 min	
7	Go live; tell your team the morning hand-off routine	25 min	

Times are rough estimates and vary by business and website platform.

PROMPT · WEEKLY CHATBOT REVIEW

Here are anonymized themes from this week's chatbot logs (no names or contact details):
[LIST TOPICS + whether answered or handed off]

Suggest which 3 FAQ entries to improve or add, using only these themes. Do not invent policies. Ask me for any fact you need before drafting new answers.

Week of	Top unanswered theme	FAQ added/updated	Hand-offs ok?

Got this from a friend? Get more practical AI guides at shop-ds.github.io →

FIRST WIN · FICTIONAL EXAMPLE

Your first win, start to finish

Walk through one FAQ chatbot answer for Riverbend Dental, a made-up family dental clinic in Austin, Texas. A website visitor asks about Saturday hours and parking. Nothing here is a real clinic, person or policy.

Example input	Value
Visitor question	"Are you open on Saturdays? Is there parking?"
Confirmed facts	Open Saturday 9am–1pm; free parking in the lot behind the clinic on Cedar Street; book online or call the front desk
Tone	Friendly and clear
Language	English

EXAMPLE COMPLETED PROMPT

Write a short FAQ chatbot answer in English, under 60 words, friendly and clear.

Visitor question: "Are you open on Saturdays? Is there parking?"

Confirmed facts: Riverbend Dental (fictional clinic in Austin) is open Saturday 9am–1pm. Free parking is in the lot behind the clinic on Cedar Street. Visitors can book online or call the front desk.

Use only these facts. Do not invent weekday hours, fees, insurance details or medical advice. If an essential fact is missing, ask me before drafting. End with one clear next step.

Copy it, open your AI assistant (ChatGPT, Claude, Gemini or Copilot), paste and send. Then compare what you get with this:

ILLUSTRATIVE ANSWER, NOT A LIVE AI RESULT

Yes — we're open Saturday 9am–1pm. Free parking is in the lot behind the clinic on Cedar Street. Want an appointment? Book online or call our front desk and we'll help you find a time.

Checks before use

- [ ] Saturday hours and parking match the confirmed facts exactly.
- [ ] No weekday hours, fees, insurance or medical claims were added.
- [ ] It ends with one clear next step (book or call).
- [ ] A human reads it before it enters the chatbot knowledge base.

USE IT

Copy the checked answer into your chatbot FAQ entry yourself. The webpage does not publish anything to your site.

Got this from a friend? Get more practical AI guides at shop-ds.github.io →

GUIDED TASK

Build FAQ pairs from your facts

When to use it: You want a clean list of question-and-answer pairs before you touch any chatbot tool. **Prepare:** A one-sentence description of your business; Confirmed hours, booking method and key policy from your own records; Any published price ranges you are willing to show (or write "ask us").

Question	Example answer
Describe your business in one sentence.	Riverbend Dental, a family dental clinic in Austin, Texas (fictional)
What are your confirmed open hours (including any Saturday or evening hours)?	Mon–Thu 8am–5pm, Fri 8am–2pm, Sat 9am–1pm; closed Sunday
How should visitors book or reach you?	Book online via our website form, or call the front desk
What is one key policy visitors ask about?	Please give 24 hours' notice to reschedule a cleaning appointment
Which language should the FAQ answers use?	English

PROMPT TEMPLATE

Turn these confirmed business facts into 8 short FAQ question-and-answer pairs for a website chatbot.
About us: [ABOUT YOUR BUSINESS]
Hours: [CONFIRMED HOURS]
How to book: [HOW TO BOOK]
Key policy: [KEY POLICY]
Language: [LANGUAGE]. Tone: friendly and clear. Each answer under 60 words.
Use only these facts. Do not invent prices, insurance, medical advice or services I did not list. If a fact is missing, ask me instead of guessing. End answers that need a decision with one clear next step.

ILLUSTRATIVE ANSWER, NOT A LIVE AI RESULT

Q: What are your hours? A: We're open Mon–Thu 8am–5pm, Fri 8am–2pm and Sat 9am–1pm. Closed Sunday. Book online or call the front desk. Q: How do I book? A: Use the booking form on our website, or call the front desk and we'll find a time. Q: How do I reschedule a cleaning? A: Please give 24 hours' notice. Book a new time online or call the front desk. (Additional pairs would stay inside the same facts.)

Checks before use

- [ ] Every hour and policy matches your records exactly.
- [ ] No prices, insurance or medical claims were invented.
- [ ] Answers are short and end with a clear next step where needed.
- [ ] Anything missing was flagged instead of guessed.

Repairs

If...	Send this
Wrong hour or policy	"Replace this assumption with the following confirmed fact: [FACT]. Change nothing else."
Invented price or service	"Remove the [PRICE / SERVICE]. I did not provide it. Keep everything else."
Too long	"Cut each answer to under 60 words. Keep every confirmed fact."

Next action: Paste the checked Q&A pairs into a simple document. That document becomes the knowledge base you load into your chatbot tool.

Got this from a friend? Get more practical AI guides at shop-ds.github.io →

GUIDED TASK

Draft one chatbot FAQ answer

When to use it: A visitor question comes up often and you want a single checked answer for the bot. **Prepare:** The question in the visitor's own words; Only the confirmed facts that answer it.

Question	Example answer
Describe your business in one sentence.	Harbor Lane Café, a neighborhood café in Portland, Oregon (fictional)
What question should the chatbot answer?	Do you have gluten-free options?
What are the confirmed facts that answer it?	We have two gluten-free sandwiches and a gluten-free brownie daily; kitchen also handles wheat, so not a dedicated gluten-free facility
What tone?	Friendly and clear
Which language should the answer use?	English

PROMPT TEMPLATE

Write a short FAQ chatbot answer in [LANGUAGE], under 60 words, tone: [TONE].
About us: [ABOUT YOUR BUSINESS]
Visitor question: [VISITOR QUESTION]
Confirmed facts: [CONFIRMED FACTS]
Use only these facts. Do not invent ingredients, allergens beyond what I listed, prices or guarantees. If an essential fact is missing, ask me before drafting. End with one clear next step.

ILLUSTRATIVE ANSWER, NOT A LIVE AI RESULT

Yes — we usually have two gluten-free sandwiches and a gluten-free brownie each day. Our kitchen also handles wheat, so we are not a dedicated gluten-free facility. Ask our team in person about today's options.

Checks before use

- [ ] Every food fact matches what you actually offer today.
- [ ] No prices or absolute "safe for celiac" claims were added.
- [ ] It is under 60 words and ends with a next step.
- [ ] A human approved it before loading it into the bot.

Repairs

If...	Send this
Wrong or invented fact	“Replace this assumption with the following confirmed fact: [FACT]. Change nothing else.”
Over-promised safety	“Remove any claim that we are a dedicated allergen-free kitchen. Keep the listed options only.”
Too vague	“Rewrite to include this confirmed detail: [FACT]. Keep the length under 60 words.”

Next action: Paste the checked answer into your chatbot knowledge base and ask the preview bot the same question on your phone.

Got this from a friend? Get more practical AI guides at shop-ds.github.io →

GUIDED TASK

Write a human hand-off line

When to use it: You need the bot to stop guessing and pass the visitor to a person. **Prepare:** When the bot should hand off (unsure, complaint, after hours); How your team actually follows up.

Question	Example answer
Describe your business in one sentence.	Northbridge Tutoring, a small tutoring studio in Manchester, UK (fictional)
When should the bot hand off to a human?	If unsure after one try, or if the visitor mentions billing, complaints or exam advice
How does a human follow up?	We reply by email on the next business morning
What tone?	Calm and helpful
Which language should the hand-off use?	English

PROMPT TEMPLATE

Write 3 short chatbot hand-off lines in [LANGUAGE], tone [TONE], each under 40 words.
About us: [ABOUT YOUR BUSINESS]
Hand off when: [HAND-OFF TRIGGERS]
Human follow-up: [HUMAN FOLLOW-UP]
Remind visitors not to paste passwords, card numbers or ID documents.
Situations: (1) bot is unsure, (2) off-limits topic, (3) after hours leave-a-message.
Use only these facts. Do not promise a reply speed I did not confirm. If something essential is missing, ask me before drafting.

ILLUSTRATIVE ANSWER, NOT A LIVE AI RESULT

1) I'm not sure I have the right answer. Leave your question and the best email to reach you (no passwords or card details) and a person from our team will help. 2) Billing and complaints need a person. Share a short note and your email — please don't include card numbers — and we'll follow up. 3) We're away from the desk right now. Leave your question and email; we reply on the next business morning.

Checks before use

- [ ] Follow-up timing matches what your team can keep.
- [ ] No reply-time promise beyond what you confirmed.
- [ ] Visitors are told not to paste passwords or card numbers.
- [ ] Lines are short and calm.

Repairs

If...	Send this
Invented reply time	“Replace the reply-time promise with: [CONFIRMED FOLLOW-UP]. Change nothing else.”
Too cold or robotic	“Rewrite in a calmer, more human tone. Keep the facts and the privacy reminder.”
Too long	“Cut each line to under 40 words. Keep the hand-off and the privacy reminder.”

Next action: Paste the checked lines into your chatbot settings for unsure, off-limits and after-hours paths, then send yourself a test hand-off.

Got this from a friend? Get more practical AI guides at shop-ds.github.io →

WHAT'S NEXT

Accurate FAQs by day. A calm hand-off by night.

A small knowledge base you checked, a no-code widget, and a clear path to a human: that is a 24/7 FAQ chatbot that helps instead of embarrassing you.
