Coaching Codex

COACHING CODEX · GUIDE 16 · AI IMAGE & VIDEO CREATION

Make Videos Without Filming: AI Voiceover & Avatar Videos

Produce explainer and promo videos without being on camera: a 60-second script from your facts, a voiceover, real visuals with captions, and an honest AI label.

60	5	3
second explainer script template	part script you fill with facts	guided tasks: script, voice, storyboard

START HERE

Business videos without a camera

You do not have to film yourself to explain your service, answer common questions or promote an offer. This guide takes you from a blank page to a finished 60-second explainer: a script built from your confirmed facts, a voiceover (your own voice or an AI voice), simple visuals with captions, and an honest label. AI drafts; you check every fact before anything is posted.

Script

60 seconds

A five-part template you fill with facts, about 150 words.

Voice

Yours or AI

Record on your phone or use a text-to-speech voice, with consent rules.

Video

No filming

Screens, photos, stock footage, captions, and an avatar only if it fits.

What's inside

01	What a no-filming video can (and can't) do	p. 3
02	The 60-second explainer script	p. 4
03	Pick your tools: voice, avatar, editor	p. 5
04	Make the voiceover	p. 6
05	Avatar videos: when they help	p. 7
06	Assemble with captions and B-roll	p. 8
07	Label it: disclosure and consent	p. 9
08	Check, repair and reuse	p. 10

YOUR FACTS IN, A VIDEO OUT

AI is good at turning notes into a clear script and reading it aloud. It does not know your prices, hours or booking steps. Every prompt here gives AI your confirmed facts, tells it not to invent anything and asks it to check with you when something is missing.

Got this from a friend? Get more practical AI guides at shop-ds.github.io →

SECTION 01 · THE BASICS

What a no-filming video can (and can't) do

Faceless videos work best when the viewer wants information: how to book, what happens at a first visit, how to use a product, what an offer includes. They work less well when people need to trust you as a person; for that, a short real clip of you or your team still helps.

Good fit	Better with a real person or real footage
How to book, order or get started	Introducing yourself and your team
Answers to common customer questions	Customer stories and testimonials
Step-by-step product or service explainers	Showing real results or finished work
Offer and event announcements	Anything that relies on a personal promise

The one-line rule

AI writes the first draft and can read it aloud; you supply the facts, the real screenshots and photos, and the final check. Never use AI to make it look as if a real customer, staff member or result exists when it does not.

PROMPT · FIND MY FIRST VIDEO TOPIC

My business: [ONE SENTENCE].
The questions customers ask me most often: [LIST 3–5 QUESTIONS].
For each question, say whether it would work as a 60-second explainer that needs no filming, and what visuals I could use (screenshots, my own photos, simple text slides). Use only what I wrote. Do not assume services, prices or steps I did not mention. If something is unclear, ask me first.

EXERCISE 1 · THREE VIDEO IDEAS (3 MINUTES)

Write three questions customers ask you again and again. Each one is a possible explainer video.

Got this from a friend? Get more practical AI guides at shop-ds.github.io →

SECTION 02 · SCRIPT

The 60-second explainer script

Voiceovers usually run at roughly 150 words a minute, so a 60-second video needs about 140–150 words. Use five parts and keep each sentence short enough to say in one breath.

Part	Time	Words	What it does
1 · Hook	0–5 s	about 12	Names the question or problem the viewer has
2 · Context	5–15 s	about 25	Says who this is for and why it matters
3 · Steps	15–45 s	about 75	Three clear steps, one idea per sentence
4 · Reassurance	45–52 s	about 15	One confirmed fact that removes a worry
5 · Call to action	52–60 s	about 15	One action: book, visit, reply, download

PROMPT · WRITE MY 60-SECOND SCRIPT

Write a 60-second explainer voiceover script (140–150 words) in **[LANGUAGE]**.
Topic: **[THE QUESTION THE VIDEO ANSWERS]**.
Viewer: **[WHO WATCHES IT]**.
My confirmed facts: **[PASTE FACTS, ONE PER LINE]**.
Call to action: **[ONE ACTION]**.
Use five labeled parts: hook, context, three steps, reassurance, call to action. Short sentences, plain words, no jargon. Use only my facts. Do not invent prices, times, guarantees or results. If a fact the script needs is missing, ask me before writing.

READ IT OUT LOUD

Time yourself reading the script at a calm pace. If it runs over 60 seconds, cut words, not facts: ask AI to shorten it to [NUMBER] words and keep every fact exactly as written.

EXERCISE 2 · YOUR FACTS LIST

For your first video, write the facts the script must include: steps, hours, where to click, what to bring.

Got this from a friend? Get more practical AI guides at shop-ds.github.io →

SECTION 03 · TOOLS

Pick your tools: voice, avatar, editor

You need a place to make the voice, a place to put the video together and, only if it suits you, an avatar tool. Many editors now include text-to-speech, so check what you already have before paying for anything. Features, plans and terms change often.

Tool type	Examples	Good for	Check first
Chat assistant	ChatGPT, Claude, Gemini, Microsoft Copilot	Scripts, shorter versions, storyboards	Nothing you upload is confidential
Text-to-speech voice	ElevenLabs; voices built into Canva, CapCut, Clipchamp	A clear voiceover from your script	Commercial-use terms for each voice
Avatar video	Synthesia, HeyGen	A presenter on screen reading your script	Consent rules and what the plan includes
Video editor	Canva, CapCut, Microsoft Clipchamp, Descript	Slides, screenshots, B-roll, captions, music	Licenses for stock footage and music

1. Write and check the script first; tools only turn it into sound and pictures.
2. Make the voiceover in one tool and download it, or use your editor's built-in voice.
3. Build the video in your editor with your own screenshots, photos and licensed stock clips.
4. Export once in 9:16 for Shorts, Reels and TikTok, and once in 16:9 for YouTube or your website if needed.

RIGHTS AND PRIVACY

Read each tool's current terms before you use a voice, avatar, clip or music track in business content. Do not upload customer recordings, staff photos or someone else's voice without their written permission. If you work with people in the UK or EU, voice recordings and images of people can be personal data under GDPR.

Got this from a friend? Get more practical AI guides at shop-ds.github.io →

SECTION 04 · VOICEOVER

Make the voiceover

You have three honest options. Your own voice builds the most trust and costs nothing but a quiet room. A stock AI voice is quick and consistent. A cloned copy of your own voice saves recording time, but only ever clone a voice you have the right to use.

Option	How	Watch out for
Your own voice	Phone voice memo in a quiet room with soft furnishings, phone 20–30 cm away	Background noise; read slowly
Stock AI voice	Paste the script into a text-to-speech tool and pick a voice	Mispronounced names, robotic pacing
Clone of your own voice	Follow the tool's verification steps with your own recordings	Never clone anyone else without written consent

PROMPT · MAKE MY SCRIPT VOICEOVER-READY

Here is my checked script: **[PASTE SCRIPT]**.
Names and words that must be pronounced correctly: **[BUSINESS NAME, PRODUCT NAMES, PLACES]**.
Rewrite it for a text-to-speech voice: spell out numbers and abbreviations as they should be spoken, add a line break where a short pause belongs, and list each name with a simple phonetic spelling I can check. Do not change any fact or add any words of content. If you are unsure how a name is pronounced, ask me instead of guessing.

FIXING PRONUNCIATION

If a voice keeps saying a name wrong, type it the way it sounds in the voice tool only (for example "Muddy Paws" stays, but "Nguyen" might become "Win"). Keep the correct spelling in your captions.

Got this from a friend? Get more practical AI guides at shop-ds.github.io →

SECTION 05 · AVATARS

Avatar videos: when they help

An avatar is a digital presenter that reads your script on screen. It can make training clips, FAQ answers and multilingual versions quicker to produce. It can also feel cold or misleading if viewers think a real person from your business is speaking. Use one only when the content is informational and you label it.

Fine to make with an avatar	Do not use an avatar for
How-to and FAQ explainers	Testimonials or "customer" reviews
Internal training and onboarding clips	Pretending to be a named staff member
Translated versions of a checked script	A real person who has not given written consent
Product feature walk-throughs	Claims about results you cannot show

PROMPT · SHOULD THIS VIDEO USE AN AVATAR?

I plan this video: **[TOPIC AND PURPOSE]**.
Viewers: **[WHO WATCHES IT]**.
The presenter would be: **[STOCK AVATAR / AVATAR OF ME WITH MY CONSENT / MY OWN VOICE WITH SLIDES]**.
List any way a viewer could be misled about who is speaking, what is real or what results to expect, and suggest the simplest honest alternative. Do not judge style or quality. If you need more detail about the video, ask me first.

FAKE ENDORSEMENTS

In the US, the FTC treats fake reviews and testimonials as deceptive, and that includes ones made with AI. UK and EU consumer law takes a similar line. Never script an avatar to play a happy customer.

Got this from a friend? Get more practical AI guides at shop-ds.github.io →

SECTION 06 · ASSEMBLE

Assemble with captions and B-roll

B-roll is anything on screen that is not a presenter: screenshots of your booking page, photos of your real shop or products, simple text slides and licensed stock clips. Many people watch with the sound off, so on-screen captions matter as much as the voice.

1. Start a 9:16 project in your editor and drop in the voiceover file.
2. Split the timeline at each part of the script (hook, context, three steps, reassurance, call to action).
3. Add one visual per sentence: a real screenshot or photo for every step, stock clips only for mood.
4. Turn on auto-captions, then correct every name, number and word by hand.
5. Add your logo and the call to action as text on the last 5 seconds, then export.

PROMPT · TURN MY SCRIPT INTO A STORYBOARD

Here is my checked 60-second script: **[PASTE SCRIPT]**.
Visuals I have: **[LIST YOUR SCREENSHOTS, PHOTOS, LOGO]**.
Make a scene-by-scene table: time, the exact line spoken, on-screen caption (under 7 words), and the visual. Use my own visuals for every step; suggest stock footage only for mood shots. Do not add new lines, facts or claims. If a step has no matching visual, write **[NEED VISUAL]** and tell me what to capture.

EXERCISE 3 · YOUR VISUALS LIST

Which screenshots or photos will you capture for your first video? One per step.

Got this from a friend? Get more practical AI guides at shop-ds.github.io →

SECTION 07 · TRUST

Label it: disclosure and consent

Being open about AI keeps viewers' trust and keeps you on the right side of platform rules. YouTube, TikTok, Instagram and Facebook all ask creators to label realistic AI-generated or altered content, and their rules change. In the EU, the AI Act adds transparency rules for AI-generated content. Check the current rules each time you post.

Situation	What to do
AI voice reads your script	Mention it in the caption or description, e.g. "Voiceover: AI voice"
Avatar presenter on screen	Use the platform's AI label and add "AI presenter" on screen
Voice or avatar based on a real person	Written consent from that person, kept on file
Only AI help with the script	Usually no label needed, but you check every fact

PROMPT · WRITE MY DISCLOSURE LINE

My video uses: **[AI VOICE / AI AVATAR / AI-WRITTEN SCRIPT / NONE OF THESE]**.
Platform: **[PLATFORM]**. Language: **[LANGUAGE]**.
Write one short, plain disclosure line for the caption and one for the screen (under 6 words). Do not claim the video is approved, certified or compliant with any law. If you need to know more about how the video was made, ask me first.

GENERAL INFORMATION, NOT LEGAL ADVICE

Platform policies and laws differ by country and change often. If your video is part of advertising in a regulated field such as health, finance or legal services, check the rules for that field before posting.

Got this from a friend? Get more practical AI guides at shop-ds.github.io →

SECTION 08 · VERIFY

Check, repair and reuse

Watch the finished video once with sound and once without. Check it against your facts list and your records, not against the AI's opinion of its own work.

- [ ] Every step, time, price and name matches your records and your facts list
- [ ] Captions are spelled correctly, including names, and readable on a phone
- [ ] Every step is shown with a real screenshot or photo of your business
- [ ] No avatar or voice pretends to be a real customer or staff member
- [ ] AI voice or avatar is labeled; the call to action works

PROMPT · FIND WHAT I DIDN'T GIVE YOU

Here are my confirmed facts: **[PASTE FACTS]**
Here is my final script and captions: **[PASTE TEXT]**
List every step, number, time, name, offer and claim in the text. Mark each FROM MY FACTS or NOT IN MY FACTS.
Then rewrite the text removing everything marked NOT IN MY FACTS. Do not add anything new.

Check	Pass?	Note
Facts match my records		
Captions correct		
Real visuals for every step		
AI labeled where used		

REPAIR PHRASES THAT WORK

For facts: **Replace this assumption with the following confirmed fact: [FACT]. Change nothing else.**
For timing: **Shorten to [NUMBER] words. Keep every fact exactly as written.** Reuse: save the checked script as a template and change only the facts for your next video.

FIRST WIN · FICTIONAL EXAMPLE

Your first win, start to finish

Walk through one 60-second explainer for a made-up dog-grooming salon in Austin, Texas. Nothing here is a real business, real people or live AI output.

Example input	Value
Business	Muddy Paws Grooming (fictional), Austin, Texas; two groomers
Video	60-second vertical explainer, voiceover with screenshots, no filming
Viewer	New customers booking their dog's first groom
Confirmed facts	Book Now on the website · choose dog size, then service · pick a time · first visit: upload vaccination record · confirmation email with drop-off time

EXAMPLE COMPLETED PROMPT

Write a 60-second explainer voiceover script (140–150 words) in English for my dog-grooming salon (fictional example for practice).

Topic: How to book your dog's first groom online.
Viewer: New customers booking for the first time.
Confirmed facts:
Book online at our website: tap Book Now
Choose your dog's size, then the service
Pick a time that suits you
First visit: upload your dog's vaccination record when you book
You get a confirmation email with your drop-off time
Call to action: Tap Book Now on our website.

Use five labeled parts: hook, context, three steps, reassurance, call to action. Short sentences, plain words. Use only these facts. Do not invent prices, opening hours, groom times, guarantees or results. If an essential fact is missing, ask me before writing.

Copy it, open your AI assistant (ChatGPT, Claude, Gemini or Copilot), paste and send. Then compare what you get with this:

ILLUSTRATIVE ANSWER, NOT A LIVE AI RESULT

Hook: Booking your dog's first groom? Here's how to do it online.
Context: At Muddy Paws Grooming, you book online, whenever it suits you.
Step 1: Go to our website and tap Book Now.
Step 2: Choose your dog's size, then pick the service you want.
Step 3: Choose a time that works for you. Because it's your first visit, upload your dog's vaccination record when you book.
Reassurance: Once you're done, we send you a confirmation email with your drop-off time, so you know exactly when to come in.
Call to action: Ready? Tap Book Now on our website.

Checks before use

- [ ] All three steps match the confirmed booking facts, in the right order.
- [ ] The vaccination record is mentioned for first visits only, as in the facts.
- [ ] The call to action is the one you gave: Tap Book Now on our website.
- [ ] Nothing else was added: no price, hours, groom length or guarantee.

USE IT

Repair anything not in your facts, read the script aloud to time it, then paste it into your voice tool or record it yourself, and build the video in your editor with real screenshots. The webpage does not create or post anything.

Got this from a friend? Get more practical AI guides at shop-ds.github.io →

GUIDED TASK

Write your 60-second explainer script

When to use it: You want to answer one common customer question with a short video. **Prepare:** The question the video answers; Your confirmed facts, one per line; The one action viewers should take.

Question	Example answer
What question does the video answer?	How to book your dog's first groom online
Who watches it?	New customers booking for the first time
Paste your confirmed facts.	Book online at our website: tap Book Now · Choose your dog's size, then the service · Pick a time that suits you · First visit: upload your dog's vaccination record · Confirmation email with your drop-off time
What should viewers do at the end?	Tap Book Now on our website
Describe your business in one sentence.	A small dog-grooming salon in Austin, Texas
Which language should the script be in?	English

PROMPT TEMPLATE

About my business: [ABOUT YOUR BUSINESS]
Write a 60-second explainer voiceover script (140–150 words) in [LANGUAGE].
Topic: [TOPIC].
Viewer: [VIEWER].
My confirmed facts:
[YOUR FACTS]
Call to action: [CALL TO ACTION].

Use five labeled parts: hook, context, three steps, reassurance, call to action. Short sentences, plain words. Use only my facts. Do not invent prices, times, guarantees or results. If a fact the script needs is missing, ask me before writing.

ILLUSTRATIVE ANSWER, NOT A LIVE AI RESULT

Hook: Booking your dog's first groom? Here's how. · Context: You book online, whenever it suits you. · Steps: tap Book Now; choose your dog's size, then the service; pick a time and, on a first visit, upload the vaccination record. · Reassurance: we email you your drop-off time. · Call to action: Tap Book Now on our website.

Checks before use

- [ ] Every step comes from your facts, in the right order.
- [ ] No price, hours, durations or guarantees you did not give.
- [ ] Read aloud at a calm pace it lasts about 60 seconds.
- [ ] You answered any questions the AI asked yourself.

Repairs

If...	Send this
Invented or changed a fact	"Replace this assumption with the following confirmed fact: [FACT]. Change nothing else."
Too long	"Shorten to 140 words. Keep every fact exactly as written. Change nothing else."
Too formal	"Rewrite in plain, friendly spoken English with shorter sentences. Keep every fact the same."

Next action: Save the checked script, time it out loud, then make the voiceover.

Got this from a friend? Get more practical AI guides at shop-ds.github.io →

GUIDED TASK

Make your script voiceover-ready

When to use it: Your script is checked and you are about to record it or paste it into a text-to-speech tool. **Prepare:** Your checked script; Names and words that are easy to mispronounce; Whether you will use your own voice or an AI voice.

Question	Example answer
Paste your checked script.	Booking your dog's first groom? Here's how. At Muddy Paws Grooming, you book online...
Which names must be pronounced correctly?	Muddy Paws Grooming; Austin
Who will read it?	A stock AI voice in my video editor
Which language should the script be in?	English

PROMPT TEMPLATE

Here is my checked script:
[SCRIPT]
It will be read by: [VOICE]. Language: [LANGUAGE].
Names that must be pronounced correctly: [NAMES].

Rewrite it for voiceover: spell out numbers and abbreviations as they should be spoken, add a line break where a short pause belongs, and list each name with a simple phonetic spelling I can check. Do not change any fact or add any content. If you are unsure how a name is pronounced, ask me instead of guessing.

ILLUSTRATIVE ANSWER, NOT A LIVE AI RESULT

Booking your dog's first groom?
Here's how.
At Muddy Paws Grooming, you book online, whenever it suits you.
Go to our website... and tap Book Now.
Pronunciation: Muddy Paws = MUD-ee PAWZ · Austin = AW-stin.

Checks before use

- [ ] Wording and facts are unchanged; only pauses and spoken forms were added.
- [ ] Every phonetic spelling matches how you actually say the name.
- [ ] Numbers read naturally (for example "nine a.m.", not "9am").
- [ ] Listen to the generated voice once before using it.

Repairs

If...	Send this
Changed the wording	"Go back to my original wording exactly. Only add line breaks and spoken forms of numbers. Change nothing else."
Invented or changed a fact	"Replace this assumption with the following confirmed fact: [FACT]. Change nothing else."
Name still wrong	"Spell [NAME] as [HOW IT SOUNDS] in the voice text only. Change nothing else."

Next action: Record it yourself or generate the voice, download the audio file and listen once from start to finish.

Got this from a friend? Get more practical AI guides at shop-ds.github.io →

GUIDED TASK

Turn your script into a storyboard

When to use it: You have a checked script and voiceover and need to plan what goes on screen. **Prepare:** Your checked script; A list of your screenshots, photos and logo; The shape: 9:16 vertical or 16:9.

Question	Example answer
Paste your checked script.	Hook: Booking your dog's first groom? Here's how. Step 1: Go to our website and tap Book Now...
Which visuals do you already have?	Screenshot of the Book Now page; size and service screen; time picker; photo of our salon front
Which shape?	9:16 vertical
Which language should the script be in?	English

PROMPT TEMPLATE

Here is my checked 60-second script:
[SCRIPT]
Visuals I have: [MY VISUALS].
Format: [FORMAT]. Caption language: [LANGUAGE].

Make a scene-by-scene table: time, the exact line spoken, on-screen caption (under 7 words) and the visual. Use my own visuals for every step; suggest stock footage only for mood shots. Do not add new lines, facts or claims. If a step has no matching visual, write [NEED VISUAL] and tell me what to capture.

ILLUSTRATIVE ANSWER, NOT A LIVE AI RESULT

0–5 s · Hook · "Your dog's first groom" · salon front photo · 5–15 s · "Tap Book Now" · Book Now screenshot · 15–30 s · "Size, then service" · size and service screen · 30–45 s · "Pick a time" · time picker · 45–52 s · "Upload vaccination record" · [NEED VISUAL]: capture the upload screen · 52–60 s · "Book Now on our website" · logo on brand color.

Checks before use

- [ ] Every spoken line is from your script, unchanged.
- [ ] Each step shows your real screen or photo, or is marked [NEED VISUAL].
- [ ] Captions add no facts, times or claims the script does not have.
- [ ] Captions are short enough to read on a phone.

Repairs

If...	Send this
Invented or changed a fact	"Replace this assumption with the following confirmed fact: [FACT]. Change nothing else."
Caption adds a claim	"Rewrite caption [NUMBER] using only words from the spoken line. Change nothing else."
Too many stock clips	"Replace stock footage in steps with [NEED VISUAL]. Keep stock only for the hook. Change nothing else."

Next action: Capture any missing screenshots, build the video in your editor, correct the captions by hand and add your AI label if needed.

Got this from a friend? Get more practical AI guides at shop-ds.github.io →

WHAT'S NEXT

One script. One voice. A 60-second video you never had to film.

Write the script from your facts, record or generate the voiceover, show real screens and photos with captions, label any AI voice or avatar, and check every fact before you post. Then reuse the template for your next question.
