HOW TO USE THE PROMPTS

Open any AI chat assistant (for example ChatGPT, Claude, Gemini or Microsoft Copilot). Copy a prompt, replace everything in [BRACKETS] with your own details, and send. Then reply with follow-ups like **"shorter"**, **"friendlier"** or **"give me 3 more options"**. The first answer is a draft, not the final word.

SECTION 01 · THE FORMULA

The C.R.A.F.T. formula: better answers in five parts

Most disappointing AI answers come from short, vague requests. Give the assistant the same briefing you would give a new team member, and the quality jumps.

Letter	Means	Ask yourself	Example
C	Context	What is my business and situation?	"I run a 3-person bakery in a busy neighborhood."
R	Role	Who should the AI act as?	"Act as an experienced local marketing consultant."
A	Ask	What exactly do I want?	"Write 5 ideas for a weekend promotion."
F	Format	How should the answer look?	"A numbered list, max 2 sentences each."
T	Tone	How should it sound?	"Warm, simple, no jargon."

MASTER TEMPLATE · C.R.A.F.T.

Context: I run **[TYPE OF BUSINESS]** in **[CITY/AREA]**. My customers are mostly **[WHO THEY ARE]**.
Role: Act as **[EXPERT ROLE, e.g. a friendly marketing consultant]**.
Ask: **[WHAT YOU WANT, e.g. give me 5 ideas to bring in more customers on quiet weekdays]**.
Format: **[e.g. a numbered list with a one-line reason for each]**.
Tone: **[e.g. practical and simple, no jargon]**.
Before you answer, ask me up to 3 questions if anything important is missing.

Three follow-ups that fix almost any answer

"Make it shorter"

Ask for half the length, or a strict word limit.

"Give me options"

Ask for 3 versions, then pick and mix the best parts.

"Sound like me"

Paste a message you wrote and ask it to match your style.

EXERCISE 1 · UPGRADE A WEAK PROMPT (5 MINUTES)

Take this weak prompt: **"Write a Facebook post about my shop."** Rewrite it using all five C.R.A.F.T. parts, then send both versions to your AI assistant and compare the results. Note down which version you would actually post.

SECTION 08 · CHECKLISTS

Before you hit “send”: quality & safety checklists

AI is a fast assistant, not a final authority. Run through these lists every time you use AI-written text with customers.

Quality check

- [ ] Facts, prices, dates and names are correct
- [ ] It sounds like **you**, not like a robot
- [ ] It’s short enough to read on a phone
- [ ] There is one clear next step for the reader
- [ ] No promises you can’t keep
- [ ] Spelling of product and place names is right
- [ ] You would be happy if a competitor read it

Safety & privacy check

- [ ] No customer names, phone numbers or IDs pasted in
- [ ] No passwords, bank details or private contracts
- [ ] Sensitive business numbers removed or rounded
- [ ] Legal, medical or tax content checked by a professional
- [ ] Images and claims don’t copy other brands
- [ ] You’ve checked the tool’s data and privacy settings
- [ ] A human reads it before customers do

IMPORTANT

AI tools can sound confident and still be wrong. Treat every answer as a first draft. For anything involving money, law, health or contracts, use AI to prepare questions, then confirm with a qualified person.

When an answer isn’t good enough

Problem	Try this follow-up
Too generic	“Use my details: [PASTE FACTS]. Remove anything generic.”
Too long	“Cut this to 60 words. Keep the key message.”
Wrong tone	“Rewrite in a warmer, more casual tone, like talking to a regular customer.”
Not sure it’s right	“Which parts of your answer are you least sure about? What should I double-check?”
