guided first win	step-by-step tasks with checks	improved prompts in 5 areas

START HERE · EDITION 2

Get one real task done, and checked, today.

Success is not just an AI answer. It is a useful result that you have checked against your own records. This edition walks you through complete tasks first, then gives you the 50-prompt library.

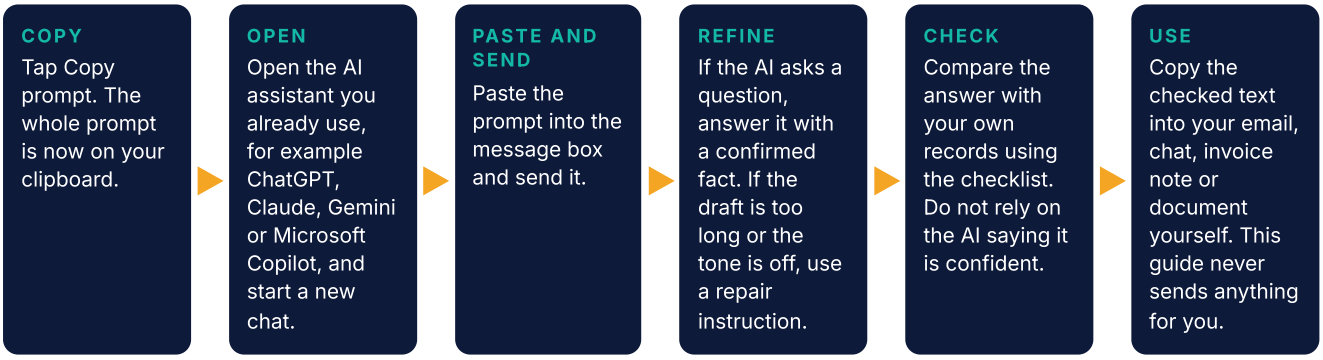

BEST ON YOUR PHONE

The **interactive web guide** on your download page asks one question at a time, builds the prompt for you and has copy buttons. This PDF has the same content for reading and printing.

Work through it in this order

1. Complete a first win using a fictional customer inquiry.
2. Choose a real task from five plain-language options.
3. Enter the business facts relevant to that task.
4. Copy the completed prompt and use it in an AI assistant.
5. Check the result using the task's checklist and revise if necessary.
6. Use the checked result and optionally save reusable business-profile details.
7. Explore the searchable 50-prompt library, C.R.A.F.T., and further practice.

The handoff: from this guide to your AI assistant

PRIVACY

Remove names, phone numbers, addresses and order or account numbers before pasting anything into an AI assistant. Prompts you paste into an external AI assistant are handled by that service under its own terms and settings. This guide does not send your prompts anywhere; it only prepares the text for you to copy.

STEP 1 · FIRST WIN · FICTIONAL EXAMPLE

Reply to a customer inquiry, start to finish

Before you use your own business details, walk through one complete task with a made-up shoe-shop inquiry. Nothing here is a real customer.

Example input	Value
Customer message	“Hi, the shoes I bought are too small. Can I exchange them?”
Confirmed policy	Free exchange within 14 days with a receipt.
Tone	Friendly and clear.
Reply language	English.

EXAMPLE COMPLETED PROMPT

Draft a friendly English reply to this customer message in under 80 words.

Customer message: "Hi, the shoes I bought are too small. Can I exchange them?"

Our confirmed policy: Free exchange within 14 days with a receipt.

Use only these facts. Do not invent stock availability, refunds, delivery arrangements, or exceptions. If an essential fact is missing, ask me before drafting.

Copy it, open your AI assistant, paste and send. Then compare what you get with this:

ILLUSTRATIVE ANSWER, NOT A LIVE AI RESULT

Hi! We offer free exchanges within 14 days with your receipt. If your purchase meets those conditions, we can help you exchange the shoes.

Checks before use

- [ ] The exchange period and receipt requirement match the actual policy.
- [ ] No availability, refund, or exception has been promised.
- [ ] The language and tone suit the customer.
- [ ] A human has read and approved the message.

USE IT

Finish by copying the checked reply into the customer conversation. The webpage does not send it on your behalf.

WHY IT WORKED

The C.R.A.F.T. formula

You just used a complete prompt. Here is why it worked. Good prompts brief the AI like a new team member, in five parts.

Letter	Means	Ask yourself	Example
C	Context	What is my business and situation?	“I run a 3-person bakery in a busy neighborhood.”
R	Role	Who should the AI act as?	“Act as an experienced local marketing consultant.”
A	Ask	What exactly do I want?	“Write 5 ideas for a weekend promotion.”
F	Format	How should the answer look?	“A numbered list, max 2 sentences each.”
T	Tone	How should it sound?	“Warm, simple, no jargon.”

IN YOUR FIRST WIN

In the shoe-shop prompt: the customer message and policy were the Context, “draft a reply” was the Ask, “under 80 words” was the Format and “friendly” was the Tone. The last line added the most important part for business use: facts only, and ask when something is missing.

MASTER TEMPLATE · C.R.A.F.T.

Context: I run **[TYPE OF BUSINESS]** in **[CITY/AREA]**. My customers are mostly **[WHO THEY ARE]**.
Role: Act as **[EXPERT ROLE, e.g. a friendly marketing consultant]**.
Ask: **[WHAT YOU WANT]**.
Format: **[e.g. a numbered list with a one-line reason for each]**.
Tone: **[e.g. practical and simple, no jargon]**.
Facts to use: **[CONFIRMED FACTS]**. Use only these facts. If something important is missing, ask me up to 3 questions before you answer.

STEP 2 · CHOOSE YOUR TASK

Five fully guided tasks

Pick the one you need today. Each task gives you short questions with examples, a prompt, an illustrative answer, checks and repairs.

Your need	Prompt	Facts you'll need	Done when
Reply to a customer inquiry	#21	Paste the customer's message.; What is the policy that applies; Any other confirmed facts; What tone should it have; Which language should the reply be in	It answers the question the customer actually asked.
Follow up on a quote	#12	What service or product was quoted; How long ago did you send it; Which quote details should be mentioned; What easy next step do you want; What tone should it have; Which language should the reply be in	Quote number, service, price and validity match the quote you actually sent.
Send a payment reminder	#33	What is the invoice reference; What is the outstanding balance; Which currency; What was the due date; How firm should it be; How can they pay?; Which language should the reply be in	Invoice reference matches your records.
Write a social caption	#2	Describe the photo.; Who is it for; Any confirmed offer details?; What should readers do; What tone should it have; Which language should the caption be in	The caption matches what is actually in the photo.
Explain a process to staff	#31	Which task; What are the actual steps, in order; Who does what; Known exceptions and checks	Every step is one you actually do, in the right order.

How the questions work

Answer one short question at a time. Give only facts you have confirmed. If you don't know a fact, leave it marked **[FILL IN]**: the prompt tells the AI to ask you rather than guess.

VERIFY AGAINST YOUR RECORDS

Check every name, number, date, price and policy against your own records (the invoice, quote, policy text or booking system). Asking the AI “are you sure?” or “how confident are you?” is not verification: it can sound sure and still be wrong.

47 **Weekly plan:** Here are my tasks for this week: [LIST]. Fixed deadlines: [DEADLINES]. Organize them by priority and suggest what to delegate, automate or drop.

48 **Explain it simply:** Explain [TOPIC, e.g. profit margin / SEO / cash flow] like I'm a busy shop owner, with one real-life example.

49 **Learning plan:** Create a 2-week plan to learn the basics of [SKILL], using 20 minutes a day. Suggest types of free resources rather than specific links I can't check.

50 **Monthly review:** Ask me 8 questions to review my business month: what worked, what didn't, and what to change next month. Ask one question at a time.

IMPROVED IN EDITION 2

WHEN AN ANSWER ISN'T RIGHT

Repairs and verification

Send these follow-ups in the same AI chat. Fix facts first, then length and tone.

Problem	Send this
Wrong or invented fact	“Replace this assumption with the following confirmed fact: [FACT]. Change nothing else.”
Promise you can't keep	“Remove any promise about [REFUNDS / STOCK / DELIVERY / DISCOUNTS]. We have not confirmed that.”
Missing information	“You assumed [X]. Do not guess. Leave a gap marked [TO CONFIRM] instead.”
Too long	“Cut this to [NUMBER] words. Keep the key message and every confirmed fact.”
Wrong tone	“Rewrite in a [WARMER / MORE FORMAL / FIRMER] tone. Keep the facts exactly as they are.”
Wrong language	“Rewrite this in [LANGUAGE]. Keep names, numbers and dates exactly as written.”
Too generic	“Use my details: [PASTE FACTS]. Remove anything that could apply to any business.”

CHECK AGAINST ORIGINAL RECORDS

Check every name, number, date, price and policy against your own records (the invoice, quote, policy text or booking system). Asking the AI “are you sure?” or “how confident are you?” is not verification: it can sound sure and still be wrong.
